

Docket No. JHM1335

Page 2

SPECIFICATION

Please cancel paragraph 1 on page 6 and substitute the following:

FIG. 4 is a detailed view of connector 40. As described above, connectors 40 attach to side frame 11b by any means well known within the art, or connector 40 and side frame 11b could be a one piece, unitary construction. In the preferred embodiment, the bottom portion 41 of connectors 40 fits within the ends of side frame 11b (see FIG. 10). The protrusion on the connector 40 is substantially circular in shape and its diameter is about the same as the inner diameter of side frame 11b. While the preferred embodiment of the protrusion is described as being substantially circular in shape, other variations and embodiments can exist wherein the protrusion can be any shape well known within the art as long as the shape of the protrusion is substantially similar to the inside shape of the side frame 11b.
